Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced May 2019 inflation at +0.68% mom (vs consensus inflation +0.53%, +0.44% in April 2019). On yearly basis, inflation was +3.32% yoy (vs consensus inflation +3.13%, +2.83% in April 2019). Core inflation was printed at +3.12% yoy (vs consensus inflation +3.08%, +3.05% in April 2019). The inflation in this month was mainly contributed by increasing in foodstuffs price (red chilli and chicken meat) and transportation cost (airfares) ahead of Ramadhan and Eid Fitri. In the Board of Governors' Meeting on 15th and 16th May 2019, Bank Indonesia kept the BI 7-day Reverse Repo Rate unchanged on 6.00%, while also maintaining the Deposit Facility (DF) and Lending Facility (LF) rates at 5.25% and 6.75% respectively. Rupiah depreciated by -1.20% to 14,385/USD at end of May 2019 from 14,215/USD in previous month. Indonesia's trade balance recorded deficit amounting to USD -2.502bn in April 2019 vs previous month surplus USD +0.540bn. The wider deficit was mostly caused by increasing in import for oil and gas, especially oil products, while export growth for oil and gas decreased by -32% compared previous month. Non-oil and gas trade balance in April 2019 recorded deficit USD -1.008bn, worse than the previous month which was surplus amounting to USD 0.989bn. The deficit was caused by decreasing of export for mineral fuels (coal). Meanwhile, oil and gas trade balance recorded deficit to USD -1.493bn in April 2019, worse than deficit on March 2019 amounting to USD -0.448bn. Indonesia's official foreign reserve as of May 2019 was at USD 120.35 billion, slightly lower than the April 2019 which stood at USD 124.30 billion. The decrement in the reserve assets per April 2019 was caused by overseas debt payment.

The JCI ended the month lower at 6209.12 (-3.81% MoM). Market laggards were BBRI, BDMN, BBNI, HMSP, and BRPT as they fell -6.18%, -47.68%, -12.5%, -3.43% and -18.11% MoM respectively. Equity markets in the region, Indonesia Inclusive, reacted negatively in May as escalation in the trade war between US-China escalated which triggered investors to retreat from emerging markets on this uncertainty and worry. On the domestic side, Indonesia's trade balance posted negative USD 2.5bn, the biggest deficit in several decades triggering concerns that Indonesia could face twin deficit risk in 2Q19. Despite the positive Indonesian post-election result, the external uncertainty weighs in on the market by a larger magnitude. This resulted in the JCI correcting by a notable degree which made the broad market valuation more attractive at below 14x P/E. That being said however, near term catalysts looks benign at this stage. Sector wise, the Mining Sector was the worst performing sector during the week, declining 7.3% MoM. Ticker wise, SMRU (SMR Utama) and KKG (Resource Alam Indonesia) were the laggards, depreciating 29.38% and 27.14% MoM respectively. This was followed by the Basic Industry Sector which dropped 6.81% WoW. Ticker wise, SMBR (Semen Baturaja Persero) and NIKL (Pelat Timah Nusantara) posted 39.29% and 28.74% MoM losses respectively. On the other hand, the best sector during the week was the Infrastructure, Utilities and Transportation Sector, which recorded a decline of 1.46% MoM. Ticker wise, BALI (Bali Towerindo Sentra) and SOCI (Soechi Lines) were the laggards which rose 18.67% and 16.57% MoM respectively.
