On yearly basis, inflation was +4.35% yoy (vs consensus inflation +3.55%, +4.19% in May 2022). Core inflation was printed at +2.63% yoy (vs consensus inflation +2.70%, +2.58% in May 2022). The higher inflation was mainly contributed by the volatile food group, especially the horticulture commodity. This policy is in line for maintaining the inflation level and exchange rate, and also to support the economic growth amid higher external pressure which was impacted by the risk of stagflation in most of country in the world. Rupiah depreciated against USD by -2.49% from 14,592 at end of May 2022 to 14,956 at end of June 2022. Indonesia's trade balance recorded surplus amounting to USD 2,895mn in May 2022 vs previous month surplus USD 7,557mn in April 2022. The lower trade surplus was impacted by the export ban of palm oil which was showed by the declining of palm oil export to EU from 45% to 3% YoY in May 2022. Non-oil and gas trade balance in May 2022 recorded surplus USD +4,753mn, which was lower than the previous month that recorded trade surplus amounting to USD +9,938mn in April 2022. Meanwhile, oil and gas trade balance still recorded deficit to USD -1,858mn in May 2022, which was lower than the deficit in April 2022 amounting to USD -2,381mn.
