### Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced November 2020 inflation at +0.28% mom (vs consensus inflation +0.19%, +0.07% in Oct 2020). On yearly basis, inflation was +1.59% yoy (vs consensus inflation +1.54%, +1.44% in Oct 2020). Core inflation was printed at +1.67% yoy (vs consensus inflation +1.73%, +1.74% in Oct 2020). The increment of inflation is contributed by the inflation on volatile food group, such as: increasing chicken & egg, horticultural plants, and fried oil on the back of higher CPO prices. While, the slightly higher on core inflation is caused by the increment inflation on clothes and footwear, healthcare, and education group prices. The BI Board of Governors agreed on 18-19 November 2020 to cut the BI 7-Day Reverse Repo Rate by 25bps to be 3.75%, and also cut the Deposit Facility (DF) and Lending Facility (LF) rates by 25bps to be 3.00% and 4.50%, respectively. This policy was in line with the inflation expectation remain low, maintain external stability, and to accelerate the economic recovery. Rupiah appreciated by +3.82% from 14,690 at end of Oct 2020 to 14,128 at end of November 2020. Indonesia's trade balance recorded surplus amounting to USD +3,607mn in Oct 2020 vs previous month surplus USD +2,438mn. The better number of trade surplus was still affected by increment on commodity price, especially CPO. Non-oil and gas trade balance in Oct 2020 recorded surplus USD +4,057mn, which was higher than the previous month that recorded trade surplus amounting to USD +2,908mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -450mn in Oct 2020, which was lower than the deficit on Aug 2020 amounting to USD +3.66 billion, lower than October 2020's number at USD 133.56 billion, lower than October 2020's number at USD133.66 billion. The decrement of foreign reserve was caused by partly due to the gov'ts external debt payment.
