Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced Aug 2021 inflation at +0.03% mom (vs consensus inflation +0.03%, +0.08% in July 2021). On yearly basis, inflation was +1.59% yoy (vs consensus inflation +1.60%, +1.52% in July 2021). Core inflation was printed at +1.31% yoy (vs consensus inflation +1.30%, +1.40% in July 2021). The lower monthly inflation was contributed by the deflation on volatile food group (lower prices of chicken and various horticulture) and the slowing down of the inflation on administered price group (chicken, and various horticulture). The BI Board of Governors agreed on 17-18 Aug 2021 to hold the BI 7-Day Reverse Repo Rate to be 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates to be 2.75% and 4.25%, respectively. This policy is to maintain Rupiah stability in the middle of global uncertainty and also the lower inflation. Rupiah appreciated against USD by +1.07% from 14,462 at end of July 2021 to 14,306 at end of Aug 2021. Indonesia's trade balance recorded surplus amounting to USD 2,589mn in July 2021 vs previous month surplus USD +1,316. The higher monthly trade surplus was caused by the lower imports number, especially on capital goods imports on the back of social restriction. While, the exports number was actually slowing down on the back of lower demand of iron and steel export from China. Even though, the CPO exports was increasing. Non-oil and gas trade balance in July 2021 recorded surplus USD +3,384mn, which was higher than the previous month that recorded trade surplus amounting to USD +2,382mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -795mn in July 2021, which was lower than the deficit in June 2021 amounting to USD -1,066mn. Indonesia's official foreign reserve in the end of Aug 2021 was at USD 144.80bn, higher than July 2021 number at USD 137.3billion due to additional fund from IMF for Special Drawing Rights (SDR) allocation amounting to USD 6.31bn.

IDR Government bond yields were closed lower across all curves in line with offshore inflows as well as IDR appreciation. The rallied in the market was supported by the domestic and global sentiments. From the domestic side, the agreement between Bank Indonesia and Ministry of Finance to have another Burden Sharing Program for 2021 and 2022 through SKB3, gave positive sentiment to market. While the positive sentiment from global, was coming from dovish stance from FED which they announced on the FOMC Meeting and Jackson Hole Symposium in August 2021 despite they will start tapering off/reducing bonds buying in this year. In August 2021, Ministry of Finance and Bank of Indonesia agreed to continue the Burden Sharing Program in 2021 and 2022 with announced the SKB 3 as legal base. In 2021, Bank Indonesia will buy bonds amounting to IDR 215tn, while they will buy bonds amounting to IDR 224tn in 2022. BI will bear the interest rate for the bonds amounting to IDR 58tn in 2021 and IDR 40tn in 2022 which will be used to finance the vaccination and healthcare program. While, the rest interest rate for the issuance bonds under this program will be paid by MoF using 7 Days Repo Rate. Offshore accounts increased their holding by IDR +14.66 in Aug 2021 (+1.52% MoM), to IDR 980.44tn as of 31 Aug 2021 from IDR 965.78tn as of 31 July, which brought their holding to 22.44% of total outstanding tradable government bond (from 22.53% in the previous month). The 5Y yield Aug 2021 ended -13bps lower to +5.04% (vs +5.17% in July 2021), 10Y tenor ended -23bps lower to +6.06% (vs +6.29% in July 2021), 15Y tenor ended -2bps lower to +6.30% (vs +6.32% in July 2021) and 20Y tenor ended -15bps lower to +6.89% (vs +7.04% in July 2021).
