On yearly basis, inflation was +4.69% yoy (vs consensus inflation +4.87%, +4.94% in July 2022). Core inflation was printed at +3.04% yoy (vs consensus inflation +2.99%, +2.86% in July 2022). This decision for this policy is as pre-emptive and forward-looking movement to mitigate the impact of the increment of core inflation and the inflation expectation on the back of the increment of non-subsidized fuel prices & volatile food group prices. This policy is expected to stabilize the Rupiah currency amid the uncertainty of global financial market. IDR Government bond yields were closed higher on short to belly tenor, while lower on the long tenor. However, after Jackson Hole Meeting, Powell indicated that FED will be more hawkish in the near term to reach their inflation target level at 2%. This was then impacted to higher US Treasury 10 yr yield which breach 3% level again. The unexpected rate hike by Bank Indonesia, resulted positive sentiment to the market for the moment.
