Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced Dec 2021 inflation +0.57% mom (vs consensus inflation +0.52%, +0.37% in Nov 2021). On yearly basis, inflation was +1.87% yoy (vs consensus inflation +1.81%, +1.75% in Nov 2021). Core inflation was printed at +1.56% yoy (vs consensus inflation +1.53%, +1.44% in Nov 2021). The increment of monthly inflation was contributed by the higher inflation of volatile food group (higher chili and cooking oil prices), and also the increment of inflation on administered prices group ahead of Christmas and New Year Holiday due to higher airfare. The BI Board of Governors agreed on 15-16 Dec 2021 to hold the BI 7-Day Reverse Repo Rate at 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 2.75% and 4.25%, respectively. This policy is to maintain Rupiah stability in the middle of global uncertainty and also the lower inflation. Rupiah appreciated against USD by +0.5% from 14,340 at end of Nov 2021 to 14,269 at end of Dec 2021. Indonesia's trade balance recorded surplus amounting to USD 3,513mn in Nov 2021 vs previous month surplus USD 5,733mn in Oct 2021. The trade surplus recorded lower growth compared last month by -39% which was impacted by higher oil and gas import which grew by +94%. Non-oil and gas trade balance in Nov 2021 recorded surplus USD +5,206mn, which was higher than the previous month that recorded trade surplus amounting to USD +6,606mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -1,693mn in Nov 2021, which was higher than the deficit in Oct 2021 amounting to USD -873mn. Indonesia's official foreign reserve in the end of Dec 2021 was at USD 144.9bn, slightly higher than Nov 2021 number at USD 145.9bn due to external debt payment.

USD government bond yields were mostly lower all across the curve amid negative global sentiments, such as: the indication of FED to end the tapering off faster than expected, concern over omicron spreading around the world and higher inflation in US and Europe Zone. Indonesia's CDS 5yr level was better in Dec 2021 compared with previous month from 85/87 to 72/74. The 5Y yield Desember 2021 ended +1bps higher to +1.69%(vs +1.68% in Nov 2021), 10yr tenor ended -16bps lower at +2.17%(vs +2.33% in Nov 2021), 20yr tenor ended -18bps lower to +3.49%(vs +3.67% in Nov 2021), and 25yr ended lower -16bps to +3.59%(+3.74% in Nov 2021).

In regards to our recent portfolio we maintain our underweight position.
