Manager Commentary

The Asian market had an overall return of 1.92% for the month of December. The top performers for the month were Korea (+6.51%) and Thailand (+6.43%). The bottom performers for the region were China (-3.25%) and the Philippines (-2.19%). Korea was a top performer led by the energy and utilities sectors. Thailand was a top performer led by the utilities and communication services sectors. China was a bottom performer due to a lagging performance in the health care and consumer discretionary sectors. The Philippines was a bottom performer due to a lagging performance in the consumer discretionary and consumer staples sectors.

Central Bureau Statistics of Indonesia (BPS) announced Dec 2021 inflation +0.57% mom (vs consensus inflation +0.52%, +0.37% in Nov 2021). On yearly basis, inflation was +1.87% yoy (vs consensus inflation +1.81%, +1.75% in Nov 2021). Core inflation was printed at +1.56% yoy (vs consensus inflation +1.53%, +1.44% in Nov 2021). The increment of monthly inflation was contributed by the higher inflation of volatile food group (higher chili and cooking oil prices), and also the increment of inflation on administered prices group ahead of Christmas and New Year Holiday due to higher airfare. The BI Board of Governors agreed on 15-16 Dec 2021 to hold the BI 7-Day Reverse Repo Rate at 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 2.75% and 4.25%, respectively. This policy is to maintain Rupiah stability in the middle of global uncertainty and also the lower inflation. Rupiah appreciated against USD by +0.5% from 14,340 at end of Nov 2021 to 14,269 at end of Dec 2021. Indonesia's trade balance recorded surplus amounting to USD 3,513mn in Nov 2021 vs previous month surplus USD 5,733mn in Oct 2021. The trade surplus recorded lower growth compared last month by -39% which was impacted by higher oil and gas import which grew by +94%. Non-oil and gas trade balance in Nov 2021 recorded surplus USD +5,206mn, which was higher than the previous month that recorded trade surplus amounting to USD +6,606mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -1,693mn in Nov 2021, which was higher than the deficit in Oct 2021 amounting to USD -873mn. Indonesia's official foreign reserve in the end of Dec 2021 was at USD 144.9bn, slightly higher than Nov 2021 number at USD 145.9bn due to external debt payment.

The JCI ended the month higher at 6,581.48 (+0.73% MoM). Market movers were ADRO, MSIN, EMTK, GEMS, and BEBS as they rose 42.21%, 386.27%, 18.44%, 84.45%, and 47.98% MoM respectively. Global stock markets rebounded in the month of December amid speculation that the Omicron coronavirus variant won't derail the economic recovery. Sales of previously owned U.S. homes increased for a third consecutive month in November, while consumer confidence rose in December by more than expected as Americans' outlook for employment and the economy improved. While on the monetary policy front, minutes of the Federal Reserve's December meeting, at which it signaled its intention to reduce monetary policy support and raise interest rates this year, show members found the economy "much stronger, with higher inflation" than in previous recoveries. This poses a risk on the equity market going forward. Moving to Indonesia, Indonesia coronavirus cases has remained low in December with no signs of another round of Covid-19 wave picking up. To prevent Omicron Virus from spreading in the country, Indonesia government has extended the quarantine days for foreigners travelling aboard to Indonesia to 7 days, from previously 3 days. On Indonesia equities, the Indonesia stock benchmark currently trades at 2022 earnings multiple of 15.2x, which is slightly above its mean but considering the already low foreign investors positioning combined with improving economic activity, strong commodity prices, upcoming tax amnesty and more technology company IPOs, we believe this will improve investors' appetite in Indonesian stock market going forward. Sector wise, the Energy Sector was the best performing sector during the month, gaining 8.88% MoM. Ticker wise, GEMS (Golden Energy Mines) and BSML (Bintang Samudera Mandiri) were the movers, appreciating 84.45% and 65.81% MoM respectively. This was followed by the Consumer Cyclical Sector which rallied 8.07% MoM. Ticker wise, MSIN (MNC Studio International) and PGLI (Pembangunan Graha Lestari) posted 386.27% and 104.59% MoM gains respectively. On the other hand, the worst sector during the month was the Properties and Real Estate Sector, which recorded a decline of 5.30% MoM. Ticker wise, KBAG (Karya Bersama Anugerah) and POLL (Pollux Properties) were the laggards, which fell 44.14% and 38.25% MoM respectively.
