MANAGER COMMENTARY

Central Bureau Statistics of Indonesia (BPS) announced inflation in Feb 2015 at -0.36% mom (vs consensus 0.18%, inflation -0.24% in Jan 2015). Lower CPI was driven by price reduction in raw foods, tobacco and transportation costs. On yearly basis, inflation printed at 6.29% YoY (vs consensus 6.70%, 6.96% in Jan 2015). Core inflation printed at 4.96% YoY (vs consensus 5.00%, 4.99% in Jan 2015). This is much faster compared to last year which began in July-August. On the monetary front, -0.24% MoM deflation was recorded in January which made BI cut its benchmark interest rate by 25bps to 7.5%, suggesting a pro-growth measure and provided support sentimentally towards the market. On the other hand, import trend is expected to be higher due to the importation of heavy equipments to accommodate for the infrastructure projects which could put pressure towards Indonesia's CAD. Sector wise, the Financial Sector was the best performing sector this month, appreciating by +7.63% MoM. BJBR (Bank Jabar) and BBRI (Bank Rakyat Indonesia) were the movers; rising by +18.79% and +10.28% MoM respectively. We remain selective on stocks that have better risk/reward in a situation where market valuation looks relatively rich.
