Return Performance

Last 1-year period		-31.28%
Best Month	Oct-15	14.32%
Worst Month	Mar-20	-28.70%

Manager Commentary

The Asian market had an overall return of 9.18% for the month of April. Each region recorded again for the month. The top performers for the region were Australia (+15.29%) and the Thailand (+16.13%). The market is slowly getting back to business and oil prices are turning positive again. Australia was a top performer led by the energy and information technology sectors. Thailand was a top performer led by the consumer discretion and industrials sectors. We are cautiously becoming optimistic about Northern Asia (especially Korea, China and Taiwan). The remission / control of the Covid-19 crisis in those countries has helped them to jumpstart their economies.

Central Bureau Statistics of Indonesia (BPS) announced April 2020 inflation at +0.08% mom (vs consensus inflation +0.20%, +0.10% in March 2020). On yearly basis, inflation was +2.67% yoy (vs consensus inflation +2.76%, +2.96% in March 2020). Core inflation was printed at +2.85% yoy (vs consensus inflation +2.88%, +2.87% in March 2020). The lower monthly inflation is contributed by the deflation that are occurred on volatile food (the declining of garlic and chicken price) and administered price (the declining of airfare) group. While, the decelerated on core inflation is caused by the deflation of onion price. In the Board of Governors' Meeting on 13-14 April 2020, Bank Indonesia hold the BI 7-day Reverse Repo Rate at 4.50% level, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 3.25% and 5.25% level, respectively. Bank Indonesia lowered the RRR for conventional banks by 200bps and for Syariah banks by 50bps. This policy is expected to increase the liquidity on banks amounting to IDR 102tn. Rupiah appreciated by +7.39% to 15,157/USD at end of April 2020 from 16,367/USD previous month. The appreciation of Rupiah is helped by the deal between Bank Indonesia and FED for giving Indonesia repo line amounting to USD 60bn to increase dollar liquidity. Indonesia's trade balance recorded surplus amounting to USD +743.4mn in March 2020 vs previous month surplus USD +2,336mn. The trade surplus was contributed by better export number for non-oil and gas sector which is showed by the increasing of export on iron & steel, precious metal, and also electrical machineries. Non-oil and gas trade balance in March 2020 recorded surplus USD +1,676mn, which was lower than the previous month surplus amounting to USD +3,268mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -932.6mn in March 2020, relatively similar with the deficit on February 2020 amounting to USD -932mn. Standard & Poor's (S&P) affirm Indonesia's sovereign credit rating on BBB, but revised the outlook from a stable outlook to negative outlook. Ratings is supported by strong economic growth prospects in future and prudent fiscal policy. The negative outlook reflected the heavy financing for addressing the impact Covid-19 which it could give risk to fiscal. Indonesia's economy grew as 2.97% yoy in 1Q 2020 (vs previous 4.97%, consensus 4.00%), and -2.41% qoq (vs previous -1.47%, consensus -1.27%). The growth surprisingly lower than most people expected. This was caused by the impact of Covid-19, hit Indonesia's faster than economist's prediction. This is the weakest Indonesia's growth since 2001. The contributor of the increment of yearly growth is still from the household consumption. While the negative quarterly growth is caused by the declining of government consumption growth by -44.02%. Indonesia's official foreign reserve as of February 2020 was at USD 130.40billion, lower than January 2020's number at USD 131.70billion. The declining of foreign reserve was caused by paying external government debt.

The JCI ended the month higher at 4,716.4 (+3.91% MoM). Market movers were BRPT, TPIA, UNVR, TLKM, and HMSP as they rose 100%, 70.95%, 14.14%, 10.76% and 11.93% MoM respectively. The JCI and overall global equity market turned positive money flow wise, as plateauing daily infection numbers on the COVID-19 cases globally gives hope which in effect would trigger several countries to ease lockdowns and restriction and provide support to economic activity. In addition, the COVID-19 vaccine and remedies from Gilead showed positive development. However, despite the positive outcomes along with monetary and fiscal stimulus measures across the globe to stem economic shocks, concern over COVID-19 impact to global economic growth still looms. Million dollar question of when exactly Covid-19 would be completely eradicated naturally or using vaccine still remains. Sector wise, the Basic Industry Sector was the best performing sector during the month, gaining 31.26% MoM. Ticker wise, BRPT (Barito Pacific) and SMCB (Holcim Indonesia) were the movers, appreciating 100% and 72.73% MoM respectively. This was followed by the Infrastructure, Utilities and Transportation Sector which rallied 13.69% MoM. Ticker wise, FREN (Smartfren Telecom) and SOCI (Soechi Lines) posted 72.58% and 46.99% MoM gains respectively. On the other hand, the worst sector during the month was the Construction, Property and Real Estate Sector, which recorded a decline of 13.4% MoM. Ticker wise, IDPR (Indonesia Pondasi Raya) and SSIA (Surya Semesta Internusa) were the laggards which fell 64.23% and 30.91% MoM respectively.
