**Manager Commentary**

Central Bureau Statistics of Indonesia (BPS) announced February 2024 inflation at +0.37% MoM (vs consensus inflation +0.24%, +0.04% in January 2024). On yearly basis, inflation was at +2.75% YoY (vs consensus inflation +2.60%, +2.57% in January 2024). Core inflation was printed at +1.68% YoY (vs consensus inflation +1.70%, +1.68% in January 2024). The higher inflation MoM was contributed by the higher price of health group and transportation. The BI Board of Governors agreed in their meeting on 20-21 February 2024 to hold the BI 7-Day Reverse Repo Rate at 6.00% and also held the Deposit Facility (DF) and Lending Facility (LF) rates at 5.25% and 6.75%, respectively. In total, Bank Indonesia had increased their benchmark rate by 250bps up to Dec 2023. The decision remains consistent with the pro-stability focus of monetary policy, namely to strengthen rupiah stabilization policy, and as a pre-emptive and forward-looking measure to maintain inflation within the 2.5%±1% target corridor in 2024. Rupiah strengthened against USD by +0.56% from 15,803 at the end of January 2024 to 15,715 at the end of February 2024. The strengthening of Rupiah was impacted by the weakening of the dollar index as several FED officials have reiterated that the FFR has reached its peak level, and there is room for rate cuts in 2024. However, the Fed will not rush into cutting the FFR. Indonesia's trade balance recorded surplus amounting to USD +2,015mn in January 2024 vs previous month surplus USD +3,285mn in December 2023. The lower trade surplus was impacted by export show negative growth in January 2024. Non-oil and gas trade balance in January 2024 recorded surplus USD +3,316mn, which was lower than the previous month that recorded trade surplus amounting to USD +5,179mn in December 2023. Meanwhile, oil and gas trade balance still recorded deficit to USD -1,301mn in January 2024, which was lower than the deficit in December 2023 amounting to USD -1,894mn. Indonesia recorded current account deficit of USD -1.29 billion in Q4 of 2023 from Current Account Surplus USD 3.50 billion in the same period of the previous year, accounting for -0.38 percent of the country's GDP. The deficit driven by goods balance surplus thinner at USD 11.30bn in Q4 of 2023 from USD 17.00bn in Q4 of 2022. Indonesia's official reserve assets position amassed USD 144.0 billion as of the end of February 2024, decrease from USD 145.1 billion as of January 2024. The decrease was impacted by government's external debt repayments.

In regards to our recent portfolio strategy, we maintain the portfolio mostly in deposits with high portion of government bond and high rating corporate bonds with maturity under 1Y.
