**Manager Commentary**

Central Bureau Statistics of Indonesia (BPS) announced Jan 2023 inflation at +0.34% mom (vs consensus inflation +0.45%, +0.66% in Dec 2022). On yearly basis, inflation was at +5.28% yoy (vs consensus inflation +5.40%, +5.51% in Dec 2022). Core inflation was printed at +3.27% yoy (vs consensus inflation +3.30%, +3.25% in Dec 2022). The lower monthly inflation was impacted by the lower inflation on volatile food and administered prices group. The lower inflation on volatile food group was caused by the deflation on chicken and tomato commodity, while the lower inflation on administered prices group was impacted by the deflation on airfare and fuel prices. The BI Board of Governors agreed on 18 - 19 Jan 2023 to increase the BI 7-Day Reverse Repo Rate by 25bps to be 5.75% and also increase the Deposit Facility (DF) and Lending Facility (LF) rates by 25bps to be 5.00% and 6.50%, respectively. In total, Bank Indonesia had increased their benchmark rate by 225bps up to Jan 2023. This decision for this policy is as front loaded, pre-emptive and forward-looking movement to lower the expectation inflation and to ensure the core inflation back to their target level at 3±1% on 1H 2023. Mr Perry Warjiyo mentioned that the latest rate hike was sufficient to bring the inflation back to their target. The Deposit Insurance Corporation (LPS) raised the Guaranteed Interest Rate for Rupiah in Commercial Bank and Rural Bank by 25bps to 4.00% and 6.50% respectively. Meanwhile, they also raised the Guaranteed Interest Rate for foreign currency deposit (forex) in Commercial Bank to 2.00%. The increase in Guarantee Interest Rate is valid for the period 1 Feb 2023 to 31 May 2023. Indonesia's trade balance recorded surplus amounting to USD +3,890mn in December 2022 vs previous month surplus USD +5,159mn in November 2022. The lower trade surplus was impacted by the lower non-oil and gas export which was in line with the lower commodity prices and also global slowing down. The import showed higher growth on volume term which the main driver was from capital goods imports. Non-oil and gas trade balance in Dec 2022 recorded surplus USD +5,613mn, which was lower than the previous month that recorded trade surplus amounting to USD +6,827mn in Nov 2022. Meanwhile, oil and gas trade balance still recorded deficit to USD -1,725mn in Dec 2022, which was higher than the deficit in Nov 2022 amounting to USD -1,668mn. The Indonesia's actual GDP growth 4Q22 recorded +5.01% YoY (vs previous +5.72%, consensus +4.92%), and also recorded growth by +0.36% QoQ (vs previous +1.81%, consensus +0.35%). In conclusion, the FY2022 grew by +5.31% YoY compared FY 2021. The household consumption which accounts by +51.87% of Indonesia's GDP, grew by +4.93% YoY in line with Indonesia's economic recovery. The better growth was also supported by the export number which grew by +16.28% YoY which accounts by +24.49% of Indonesia's GDP. The higher growth on export was impacted by the higher global commodity prices. However, the government consumption which was accounted by 7.66% of Indonesia's GDP, contracted by -4.51% YoY in 2022. Indonesia's official reserve assets position amassed USD 139.4 billion as of end January 2023, increased from USD137.2billion as of end December 2022. The increment was impacted by the issuance of government global bonds as well as tax & service receipts.
