**Manager Commentary**

Asia ex Japan equities advanced moderately over June, helped by a recovery in Chinese stocks. However, the region closed the month off its best, undermined by disappointment over the size of stimulus measures in China and hawkish statements from central banks in developed markets, particularly the US. Chinese equities rebounded strongly over the first half of June, boosted by growing expectations of further fiscal and monetary support. However, shares later lost some of these gains as data highlighted the extent of the slowdown and the effect it was having on Chinese companies, with industrial profits dropping by 18.8% from a year earlier in the first five months of 2023. While the authorities did announce support measures in June, these came in at the lower end of expectations. Nevertheless, Chinese Premier Li Qiang indicated the nation was still on track to reach its annual growth target of around 5%, with the pace of growth expected to pick up in the second quarter compared to the first quarter's 4.5% expansion. Australian shares closed a volatile month modestly higher. The Reserve Bank of Australia unexpectedly raised interest rates by 25 basis points to 4.1% but fears of another unexpected rate hike were allayed by softer-than-expected inflation data for May. Meanwhile, following their surge during the previous month, the tech-heavy markets of Taiwan and South Korea delivered a more muted performance in June. The annual inflation rate in Taiwan eased to 2.02% in May, the lowest reading since July 2021, while South Korea's annual inflation rate slid to 3.3%, the lowest level since October 2021. ASEAN markets retreated slightly overall. Singapore delivered the strongest gains. While economic activity in the city state eased from April's five-month high in May, inflation is also decelerating, with the annual rate falling to a five-month low of 5.1% in May. Elsewhere, returns in the Philippines, Thailand and Indonesia were roughly flat while Malaysia retreated slightly.

Central Bureau Statistics of Indonesia (BPS) announced June 2023 inflation at +0.14% MoM (vs consensus inflation +0.28%, +0.09% in May 2023). The higher inflation MoM was contributed by the higher price of transportation group, food, beverage group and health group. The BI Board of Governors agreed on 21-22 June 2023 to hold the BI 7-Day Reverse Repo Rate at 5.75% and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 5.00% and 6.50%, respectively. In total, Bank Indonesia had increased their benchmark rate by 225bps up to Jan 2023. This decision for this policy is as front loaded, pre-emptive and forward-looking movement to lower the expectation inflation and to ensure the core inflation back to their target level at 3±1% on 1H 2023. Bank Indonesia mention BI focus into enhancing IDR value stabilization in order avoid imported inflation and reduce the spread of uncertainty on global financial markets.
