Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced May 2021 inflation at +0.32% mom (vs consensus inflation +0.29%, +0.13% on April 2021). On yearly basis, inflation was +1.68% yoy (vs consensus inflation +1.67%, +1.42% on April 2021). Core inflation was printed at +1.37% yoy (vs consensus inflation +1.30%, +1.18% on April 2021). The May inflation was improved which was affected by the higher core inflation due to higher global gold price, and the higher inflation on administered price group which was caused by the higher transportation cost on the Idul Fitri Season. The BI Board of Governors agreed on 24-25 May 2021 to hold the BI 7-Day Reverse Repo Rate to be 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates to be 2.75% and 4.25%, respectively. This policy is to maintain Rupiah stability in the middle of global uncertainty and also the lower inflation. Rupiah appreciated against USD by +1.12% from 14,453 at end of April 2021 to 14,292 at end of May 2021. Indonesia's trade balance recorded surplus amounting to USD +2,194mn in April 2021 vs previous month surplus USD +1,568mn. The better trade surplus was caused by the higher export number on non-oil and gas on the back of higher CPO export to China in line with global economics recovery. Non-oil and gas trade balance in April 2021 recorded surplus USD +3,261mn, which was higher than the previous month that recorded trade surplus amounting to USD +2,941mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -1,067mn in April 2021, which was lower than the deficit on March 2021 amounting to USD -1,373mn. Indonesia's official foreign reserve as of May 2021 was at USD 136.4billion, lower than March 2021 number at USD 138.8billion due to government's foreign debt payments.

In regards to our recent portfolio strategy, we maintain the portfolio mostly in deposits and would seek the opportunity to buy high rating corporate bonds with maturity under 1Y.
