In total, Bank Indonesia had increased their benchmark rate by 225bps up to Jan 2023. This decision for this policy is as front loaded, pre-emptive and forward-looking movement to lower the expectation inflation and to ensure the core inflation back to their target level at 3±1% on 1H 2023. Bank Indonesia mention BI focus slight change into enhancing IDR value stabilization in order avoid imported inflation and reduce the spread of uncertainty on global financial markets Rupiah depreciated against USD by -2.33% from 14,661 at end of April 2023 to 15,003 at end of May 2023.
