Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced Aug 2020 deflation at -0.05% mom (vs consensus inflation +0.01%, -0.10% in July 2020). On yearly basis, inflation was +1.32% yoy (vs consensus inflation +1.40%, +1.54% in July 2020). Core inflation was printed at +2.03% yoy (vs consensus inflation +2.00%, +2.07% in July 2020). The monthly deflation was contributed by the deflation on volatile food and administered price group. The deflation on volatile food group was affected by the declining of chicken, onion, and rice price, while the administered price group was impacted by the declining of transportation cost. The core inflation was contributed by the increment of gold price. In the Board of Governors' Meeting on 18-19 Aug 2020, Bank Indonesia hold the BI 7-day Reverse Repo Rate at 4.00%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 3.25% and 4.75% level, respectively. This policy is expected to maintain the external stability in line with their expectation that the inflation remain low. Rupiah slightly appreciated by +0.68% from 14,653 at the end of July 2020 to 14,554 at the end of Aug 2020. Indonesia's trade balance recorded surplus amounting to USD +3,263mn in July 2020 vs previous month surplus USD +1,268mn. The surplus was caused by better number in export which was supported by the increment on commodities prices, especially CPO price and also the increasing in export number for iron & steel, especially to China. Non-oil and gas trade balance in July 2020 recorded surplus USD +3,516mn, which was higher than the previous month that recorded trade surplus amounting to USD +1,372mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -253mn in July 2020, which was higher than the deficit on June 2020 amounting to USD -95mn. Indonesia's official foreign reserve as of Aug 2020 was at USD 137.0 billion, higher than July 2020's number at USD 135.1 billion. The increment of foreign reserve was supported by the withdrawal of government loans and oil & gas export proceeds.

In regards to our recent portfolio strategy, we maintain the portfolio mostly in deposits and would seek the opportunity to buy high rating corporate bonds with maturity under 1Y.
