Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced March 2020 inflation at +0.10% mom (vs consensus inflation +0.13%, +0.28% in February 2020). On yearly basis, inflation was +2.96% yoy (vs consensus inflation +2.92%, +2.98% in February 2020). Core inflation was printed at +2.87% yoy (vs consensus inflation +2.76%, +2.76% in February 2020). The lower monthly inflation was affected by the deflation in volatile price (fish & garlic price) and administered price (airfares). While the higher core inflation was contributed by higher of gold price. In the Board of Governors' Meeting on 18-19 March 2020, Bank Indonesia cut the BI 7-day Reverse Repo Rate by 25bps to be 4.50%, and also cut the Deposit Facility (DF) and Lending Facility (LF) rates by 25bps to be 3.25% and 5.25%, respectively. Bank Indonesia also announced seven monetary policies that are expected to help the Indonesia's economics, as follows: 1) triple intervention for FX spot, DNDP, and bond market; 2) adding repo facility up to 12 months, 3) adding frequency of FX swap to be every day, 4) expanding the 50bps RRR cut, 5) enhancing FX term deposit instrument, 6) implemented vostro rupiah account for foreign investor as underlying of DNDP transaction, and 7) strengthening the payment system to mitigate the spread of Covid-19. Rupiah depreciated by -15.00% to 16,367/USD at end of March 2020 from 14,234/USD previous month. Indonesia's trade balance recorded surplus amounting to USD +2,336mn in February 2020 vs previous month deficit USD -864mn. The trade surplus was contributed by higher export number for non-oil and gas sector, especially the higher demand from China for coal and also the increasing of CPO price. Non-oil and gas trade balance in February 2020 recorded surplus USD +3,268mn, while the previous month resulted deficit amounting to USD -361mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -932mn in February 2020, but the deficit is lower than the deficit on January 2020 amounting to USD -1,181mn. Indonesia's official foreign reserve as of March 2020 declined by USD 9.40bn to USD 121bn, lower than February 2020's number at USD 130.40bn. The declining of foreign reserve was caused by paying external government debt and for stabilizing IDR currency in this current situation.

In regards to our recent portfolio strategy, we maintain the portfolio mostly in deposits and would seek the opportunity to buy high rating corporate bonds with maturity under 1Y.
