Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced November 2019 inflation at +0.14% mom (vs consensus inflation +0.20%, +0.02% in October 2019). On yearly basis, inflation was +3.00% yoy (vs consensus inflation +3.06%, +3.13% in October 2019). Core inflation was printed at +3.08% yoy (vs consensus inflation +3.14%, +3.20% in October 2019). The inflation was still affected by increasing prices in food stuffs group, such as: meat, chicken & tomato. In the Board of Governors' Meeting on 20th and 21st November 2019 Bank Indonesia kept the BI 7-day Reverse Repo Rate unchanged on 5.00%, also maintaining the Deposit Facility (DF) and Lending Facility (LF) rates at 4.25% and 5.75%, respectively. This policy is still supported by manageable inflation that within target range as well. In contrast with that, BI lowered the bank's reserve requirements for second times in this year by 50bps to 5.50% for commercial banks and to 4.00% for syariah banks. This policy which will be implemented in January 2020, is expected to give liquidity in banks sector amounting to IDR 26trillion. Rupiah depreciated by -0.67% to 14,102/USD at end of November 2019 from 14,008/USD in previous month. Indonesia's trade balance recorded surplus amounting to USD +161mn in October 2019 vs previous month deficit USD -160mn. The surplus was caused by the declining of import growth deeper than export growth. The slowing down on import and export was affected by global trade slowing down, including Indonesia's biggest trading partner, China. Non-oil and gas trade balance in October 2019 recorded surplus USD +990mn, higher than the previous month which was also resulting surplus amounting to USD +601mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -829mn in October 2019, higher than the deficit on September 2019 amounting to USD -762mn. Indonesia's official foreign reserve as of November 2019 was at USD 126.63billion, slightly lower than October 2019's number at USD 126.7billion.

In regards to our recent portfolio strategy, we maintain the portfolio mostly in deposits and would seek the opportunity to buy high rating corporate bonds with maturity under 1Y.
