#### Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced Nov 2021 inflation +0.37% mom (vs consensus inflation +0.31%, +0.12% in Oct 2021). On yearly basis, inflation was +1.75% yoy (vs consensus inflation +1.70%, +1.66% in Oct 2021). Core inflation was printed at +1.44% yoy (vs consensus inflation +1.44%, +1.33% in Oct 2021). The higher monthly inflation was impacted by the increment in core inflation, volatile food, and administered price group. The increment in core inflation was caused by higher global gold price. For the increment of inflation in volatile food group was affected by the higher global CPO price (impacted to higher cooking oil price), while for the increment of inflation in administered price group was impacted by the air fare in line with the mobility relaxation. The BI Board of Governors agreed on 17-18 Nov 2021 to hold the BI 7-Day Reverse Repo Rate at 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 2.75% and 4.25%, respectively. This policy is to maintain Rupiah stability in the middle of global uncertainty and also the lower inflation. Rupiah depreciated against USD by -1.05% from 14,171 at end of Oct 2021 to 14,320 at end of Nov 2021. Indonesia's trade balance recorded surplus amounting to USD 5,733mn in Oct 2021 vs previous month surplus USD 4,371mn. October 2021 recorded the highest trade surplus which was caused by the higher global commodity prices, especially CPO and coal. Non-oil and gas trade balance in Oct 2021 recorded surplus USD +6,606mn, which was higher than the previous month that recorded trade surplus amounting to USD +5,305mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -873mn in Oct 2021, which was better than the deficit in Sep 2021 amounting to USD -934mn. Indonesia's official foreign reserve in the end of Nov 2021 was at USD 145.9bn, slightly higher than Oct 2021 number at USD 145.5bn due to tax revenue and external debt.

USD government bond yields were mostly higher, except the 10 yr tenor which was lower. The offshore names continued to record outflows on November, while onshore banks also continue absorbing the bonds in the market especially in 10yr tenor. The negative sentiments mostly came from the global side, especially, the re-elected of Jerome Powel as FED Chairman which showed FED their hawkish tone with the probability for rate hike in 2022 to address the higher inflation (the November inflation was 6.2% YoY) by accelerating the tapering timeline. That news brought the US Treasury Yield to 1.6% level. The increment of new cases in Europe Zone and the announcement of the new Covid-19 variant, Omicron, which already spread around the world, also haunted the bearish market. Indonesia's CDS 5yr level was higher in Nov 2021 compared with previous month from 81/82 to 85/87. The 5Y yield Nov 2021 ended +1bps higher to +1.68%(vs +1.67% in Oct 2021), 10yr tenor ended -7bps lower at +2.33%(vs +2.40% in Oct 2021), 20yr tenor ended +1bps higher to +3.67%(vs +3.66% in Oct 2021), and 25yr ended flat to +3.74%(+3.74% in Oct 2021).

In regards to our recent portfolio we maintain our underweight position.
