Pricing Frequency	Daily
Bid-Offer Spread	5.00%
Management Fee	2.00% p.a.
Custodian Bank Name	Bank HSBC Indonesia
Total Unit	237,149,230.0147

#### Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced Sep 2021 deflation at -0.04% mom (vs consensus inflation +0.03%, +0.01% in Aug 2021). On yearly basis, inflation was +1.60% yoy (vs consensus inflation +1.66%, +1.59% in Aug 2021). Core inflation was printed at +1.30% yoy (vs consensus inflation +1.33%, +1.31% in Aug 2021). The deflation was mainly contributed by the deflation on volatile food group which was impacted by the lower chicken and various horticulture prices. The BI Board of Governors agreed on 20-21 Sep 2021 to hold the BI 7-Day Reverse Repo Rate to be 3.50%, and also hold the Deposit Facility (DF) and Lending Facility (LF) rates to be 2.75% and 4.25%, respectively. This policy is to maintain Rupiah stability in the middle of global uncertainty and also the lower inflation. Rupiah depreciated against USD by -0.10% from 14,306 at end of Aug 2021 to 14,321 at end of Sep 2021. Indonesia's trade balance recorded surplus amounting to USD 4,746mn in Aug 2021 vs previous month surplus USD 2,589mn. The trade surplus recorded the historical high in Aug 2021 which was contributed by the coal and CPO exports. Non-oil and gas trade balance in Aug 2021 recorded surplus USD +5,728mn, which was higher than the previous month that recorded trade surplus amounting to USD +3,384mn. Meanwhile, oil and gas trade balance still recorded deficit to USD -982mn in Aug 2021, which was higher than the deficit in June 2021 amounting to USD -759mn. Indonesia's official foreign reserve in the end of Sep 2021 was at USD 146.90bn, higher than Aug 2021 number at USD 144.80bn due to tax & services receipts and also the government's external debt withdrawal.

The JCI ended the month higher at 6,286.94 (+2.22% MoM). Market movers were BBKA, BYAN, MASA, TLKM, UNTR, and BBHI as they rose 6.87%, 98.65%, 113.70%, 8.53%, and 29.51% MoM respectively. Global stock markets continued to strengthen in September despite highly volatile for the first half of the month on the back of uncertainty over US debt ceiling announcement and faster than expected US treasury yield that would spur the FED to shorten its tapering timeline. In addition, EM stocks corrected more than DM stocks as result of a sharp fall in Chinese markets on tightening tech regulations and China Evergrande Group's debt issue. However, global stocks recovered as contagion fears from Evergrande's huge USD 300bn debt woes as the company had settled its domestic bond payment by end of Sep-21. Looking domestically in Indonesia, faster than projected vaccine distribution in Jakarta greater area (25% of Indo's GDP portion), lower new covid cases and strong recovery on the Coal and CPO prices which have reached USD 280/ton (+198% YTD) and MYR 4.8k/ton (+28% YTD), respectively, have triggered foreign investors to increase its exposure in the Indonesian stock market. In which it was reflected in the foreign inflows which accelerated to IDR 9tn in Sep-21, the highest monthly inflows since Jan-21. Market wise, the JCI currently trades at 2022 earnings multiple of 15.3x, which is still below its mean and considering the already low foreign investors positioning combined with improvement in economic activity in 4Q21, strong commodity prices and upcoming technology company IPOs, we believe this will improve investors' appetite in Indonesian stock market going forward. Sector wise, the Energy Sector was the best performing sector during the month, gaining 32.36% MoM. Ticker wise, PKPK (Perdana Karya Perkasa) and BYAN (Bayan Resources) were the movers, appreciating 150.82% and 98.65% MoM respectively. This was followed by the Transportation and Logistic Sector which rallied 13.21% MoM. Ticker wise, TNCA (Trimuda Nuansa Citra) and TRUK (Guna Timur Raya) posted 63.20% and 46.72% MoM gains respectively. On the other hand, the worst sector during the month was the Technology Sector, which recorded a decline of 14.09% MoM. Ticker wise, TECH (Indotester Technomedia) and TFAS (Telefast Indonesia) were the laggards, which fell 36.67% and 30.95% MoM respectively.
