Antigen Criteria is Acceptable for Confirmation of Covid-19 Positive Cases

Spokesperson for the Ministry of Health (Kemkes), Dr. Siti Nadia Tarmizi said the government had decided on an antigen test as a tool for tracing or tracking positive cases of Covid-19. However, not all antigen test kits can be used to confirm positive cases of Covid-19, but only those that meet the criteria. "The determination of these criteria is to maintain the quality of the antigen test kits," said Siti in a virtual press conference regarding the use of the Antigen Test, Wednesday (10/2/2021). In this case, there are four criteria. First, it already has a distribution permit from the Ministry of Health which is registered on the official website infoalkes.kemkes.go.id. Second, at least it has met one of the emergency use lists (EUL) from the World Health Organization / WHO. When, it has received approval from the United States Food and Drug Administration (FDA), and the fourth has received permission from the European FDA.

Although Without Salary Subsidies, MSME Incentives and Pre-Employment Cards Are Considered To Be Able To Restore the Economy

Minister of Manpower (Menaker) Ida Fauziyah stated that the government remains committed to protecting workers as part of the National Economic Recovery strategy even though wage or salary subsidies (BSU) will be eliminated in 2021. "Therefore, the provision of incentives for the business world and capital support for the MSME sector continues with "We hope that production activities can continue so that workers or laborers can return to work," she told Kompas.com, Thursday (11/2/2021). Labor-intensive and entrepreneurial programs in various ministries and institutions are still being rolled out to become a safety net for the purchasing power of workers and people who are still affected by the Covid-19 pandemic. The pre-employment card is also part of the PEN program and overcomes the explosion of layoffs that occurred due to the pandemic.

China Records 0.3 Percent Deflation in January 2021

China recorded the first deflation in more than a decade in January 2021. Based on Bloomberg on Wednesday (10/2/2021), the National Bureau of Statistics (NBS) noted that the consumer price index (CPI) fell 0.3 percent on January 2021 compared to the same month the previous year. Meanwhile, the Core CPI which excludes food and energy prices also fell 0.3 percent in January. On the other hand, the producer price index (PPI) recorded inflation of 0.3 percent in January 2021, driven by rising commodity prices. The contrasting CPI and PPI reflect China's uneven economic recovery from the coronavirus pandemic as industrial production exceeds consumer spending. Coronavirus-related travel restrictions to control the new Covid-19 outbreak are likely to increase that trend in January as consumer further limit spending before the Lunar New Year holidays.
