Manager Commentary

Central Bureau Statistics of Indonesia (BPS) announced September 2023 inflation at +0.19% MoM (vs consensus inflation +0.12%, -0.02% in August 2023). On yearly basis, inflation was at +2.28% YoY (vs consensus inflation +2.20%, +3.27% in August 2023). Core inflation was printed at +2.00% YoY (vs consensus inflation +2.06%, +2.18% in August 2023). The higher inflation MoM was contributed by the higher price of food, beverage, tobacco group, and clothing group. The BI Board of Governors agreed on 20-21 September 2023 to hold the BI 7-Day Reverse Repo Rate at 5.75% and also hold the Deposit Facility (DF) and Lending Facility (LF) rates at 5.00% and 6.50%, respectively. In total, Bank Indonesia had increased their benchmark rate by 225bps up to Jan 2023. The decision is consistent with the monetary policy stance of managing inflation under 3.0% this year and 2.5% in 2024. The policy concentrate on rupiah stability in order to manage imported inflation and limit the spreading effect of global financial market uncertainties. Rupiah weakened against USD by -1.64% from 15,237 at end of August 2023 to 15,487 at end of September 2023. The weakened of Rupiah was impacted by hawkish statement from Jerome Powell and many Fed official that stated the Fed still need hike rate until the Fed get assurance that inflationary path to inflation target of 2% without causing damage to US economy. Indonesia's trade balance recorded surplus amounting to USD +3,124mn in August 2023 vs previous month surplus USD +1,292mn in July 2023. The higher trade surplus was impacted by import fell deeper and export. Non-oil and gas trade balance in August 2023 recorded surplus USD +4,468mn, which was higher than the previous month that recorded trade surplus amounting to USD +3,197mn in July 2023. Meanwhile, oil and gas trade balance still recorded deficit to USD -1,343mn in August 2023, which was lower than the deficit in July 2023 amounting to USD -1,905mn. Indonesia's official reserve assets position amassed USD 134.9 billion as of the end of September 2023, decrease from USD 137.1 billion as of August 2023. The decrease was impacted by the government's external debt repayments and the need for Rupiah stabilization.

The JCI ended the month lower at 6,939.89 (-0.19 % MoM). Market laggards were BBRI, GOTO, BBKA, MDKA, and ASII as they fell -5.86%, -11.46%, -3.81%, -14.79% and -3.49% MoM respectively. Global equities corrected further in September as market begins pricing in lesser interest rate cut by the Fed in 2024 on the back of recent hawkish statement by the Fed officials. This is also apparent in the US 10Y bond yield, which has risen by 47bps MoM to 4.58% in September. Domestically in Indonesia, the JCI posted only a slight negative return in September as the country offers more stable macro environment, in which the inflation is well contained at 3.3% as of August and less pressure for Bank of Indonesia to do further monetary tightening. Sector wise, the Properties and Real Estate Sector was the worst performing sector during the month, declining -4.41% MoM. Ticker wise, MPRO (Maha Properti Indonesia) and TARA (Agung Semesta Sejahtera) were the laggards, depreciating -55.10% and -16.67% MoM respectively. This was followed by the Consumer Cyclical Sector which dropped -3.98% MoM. Ticker wise, MKNT (Mitra Komunikasi Nusantara) and SHID (Hotel Sahid Jaya) posted -66.67% and -42.90% MoM losses respectively. On the other hand, the best sector during the month was the Basic Material Sector, which recorded a gain of +8.44% MoM. Ticker wise, BMSR (Bintang Mitra Semestara) and SULI (Sumalindo Lestari Jaya) were the movers which rose +38.93% and +38.58% MoM respectively.
